

## Distributed Data Analytics Test

### Q1: What is the blockchain?

A distributed database comes under Distributed Ledger Technology  
a system in which a record of transactions that is shared among the  
nodes of a computer network. Known in a cryptocurrency, is  
maintained across computers that are linked in a peer-to-peer  
network. A blockchain collects information together in groups, known  
as blocks, that hold sets of information.

note: do not type out of the box your answer or on the lines only between the lines  
and in the box otherwise your answer will not be recognized
